

SureSmile® Bracket Scan Request Form

INSTRUCTIONS

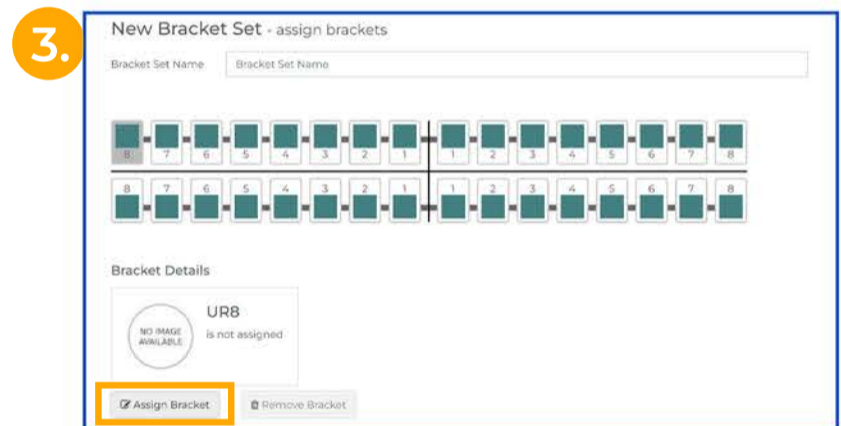

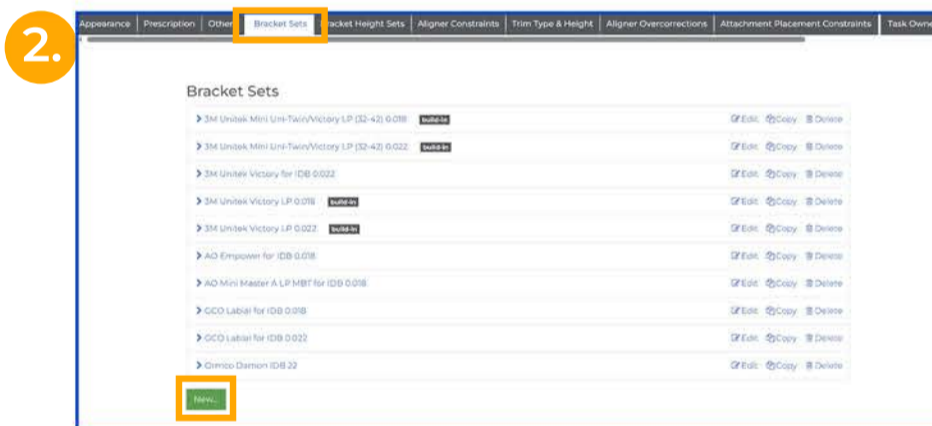

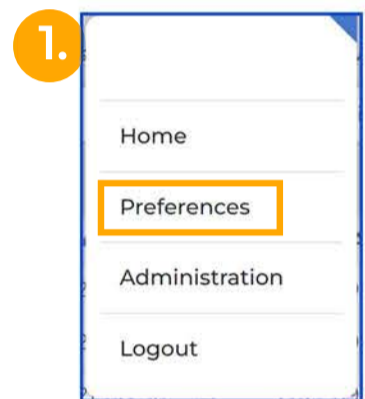

NOTE: Once the form is filled out, it may take up to **90 days** for brackets to be added to the library. Please do not request brackets to be rushed for approval.

Brackets from different manufacturers/families/slot sizes will need to be filled out on separate forms. Brackets are not ordered in sets, but individually with part numbers; please have those numbers readily available when checking if they are approved in the SureSmile® system or filling out the request form.

The form on the following page should be filled out for brackets that are **NOT** already approved in SureSmile®.

Please confirm brackets are not already approved in SureSmile® by going into the database.

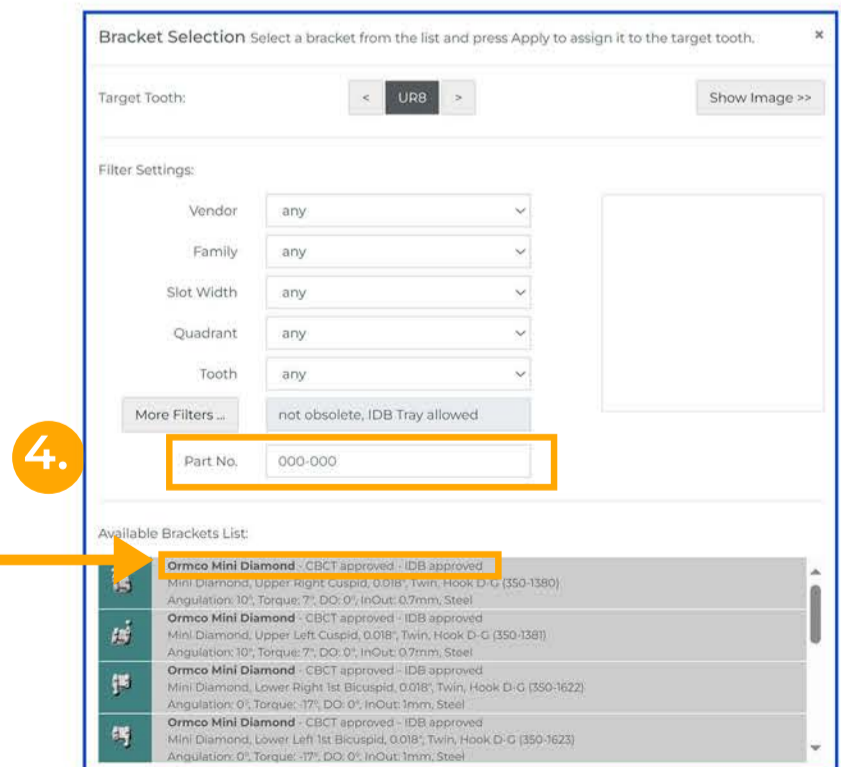

1. Open “Settings”, then “Preferences”.
2. Click on the “Bracket Sets” tab, and on the bottom of the page, click the “New” button.
3. Click the “Assign Brackets” button
4. Input the “Part No.” of the bracket. If the bracket populates, it is in the library.
If a bracket doesn’t show, continue with the form.

NOTE: Not all brackets are IDB approved or CBCT approved.

Ceramic or clear brackets may not always be CBCT approved and “Weldable” brackets will **NOT** be IDB approved (bondable brackets only).

To check if the EXISTING approved brackets in SureSmile® are CBCT or IDB approved, input the Part No. (shown above), and the information that populates with the bracket will reveal the compatibility.
